

**HEBNER BARN
PA22-0208**

Manure Handling, Storage and Removal Plan

- The Barn will utilize a new program from Waste Management of Orange County, called the “Clean Manure Only” recycling program.
- Manure Bin Service (Manure Removal): a covered manure bin will be provided by waste management and picked up weekly.
- The only materials that can be disposed of in the bin include manure, wood shavings and stable bedding.
- Manure will be picked up daily and disposed of in the manure bin.
- Shavings and bedding soiled by contact with manure will be replaced as needed. The resulting material will be removed from stall and deposited in the manure bin.
- Trash containers will be located on the project site, to the east of the main gate, immediately south of the proposed Barn building.
