Re: CITADEL Project No. 1358.1053.0
Initial Site Assessment – Supplemental Technical Memo
OC Loop Segments O, P, and Q Project
Los Angeles and Orange Counties, California

Dear Ms. Partridge:

Citadel EHS (Citadel) completed the Initial Site Assessment (ISA) for the OC Loop Segments O, P, and Q Project (Project) in March 2020. The County of Orange updated crossing methods at four locations:

- Open Cut Box Culvert for the Artesia Boulevard Undercrossing (between Segment O and P)
 - This method involves lowering the bikeway on both approaches to Artesia Boulevard within the Los Angeles County Flood Control District (LACFCD) right of way along the north side of Coyote Creek Channel and installing a 12-foot wide by 10-foot precast reinforced concrete box (RCB) culvert that would house the bikeway. This method involves excavating to a maximum depth of 17 feet.
- Open Cut Box Culvert Underpass for the BNSF Industry Lead (Spur) (Segment Q)
 - This method involves excavating (to a maximum depth of 15 feet) down-ramps supported on both sides by retaining walls, on both the downstream and upstream approaches to the BNSF Industry Lead track.
- Overcrossing of the UPRR Industry Lead Track (Segment P)
 - This method involves bridging over the existing single track railroad corridor used by UPRR freight trains. The bike path transitions down to grade in a zig-zag or switchback alignment supported by retaining walls on either side.
- Overcrossing of the BNSF/Metrolink/Amtrak (LOSSAN) Corridor and Stage Road (Segment Q)
 - This method involves bridging over the existing three-track (with a 4th track proposed) railroad corridor that is used by BNSF freight trains, Metrolink commuter rail trains, and Amtrak intercity passenger rail trains. The bridge would diagonally cross the channel so as to eventually meet up with OC Loop Segment R, at La Mirada Boulevard, which is on the opposite side of the channel. As bicyclists travel north (upstream), and so as to not exceed a maximum five percent grade, the bridge would continue over Stage Road and then touch down just beyond Stage Road. A total of approximately 2,000 feet of bridge is required.

The Project with the updated crossing methods includes two parcel takes:

- The first parcel take (Parcel 1) is located west of the BNSF railroad crossing in Segment Q and involves taking an approximately 11-foot wide strip of a parcel that is used as a parking lot for a commercial land use.

- The second parcel take (Parcel 2) is located east of Stage Road in Segment Q and involves taking an approximately eight-foot wide of the approximately 14-foot wide strip of landscaped land adjacent to an apartment complex.

Current Conditions

Citadel representative Ms. Shirley Lee conducted the Site reconnaissance on July 28, 2021. Parcel 1 is located in the northeast corner of the property at 5650 Dolly Avenue in Buena Park, which is currently developed with a warehouse structure occupied by Amazon.com Services LLC. Parcel 1 consists of approximately 2,707 square feet (SF) of concrete-paved parking area. No stationary equipment was observed at Parcel 1.

Parcel 2 is located along the entire northwest boundary of the property located at 7651 Stage Road, which is currently developed with multi-family residences, and a small portion of the property located at 5301-5333 Beach Boulevard, which is currently developed with a large retail shopping center. The nearest structure at the retail shopping center is approximately 140 feet southeast of Parcel 2 and is occupied by LiMai Montessori Academy at 5309 Beach Boulevard. Parcel 2 consists of approximately 5,123 SF of landscaped area. No stationary equipment was observed at Parcel 2.

In addition to the parcel takes, two temporary construction easements (TCE) are proposed:

- TCE 1: Approximately 0.97 acre of the asphalt-paved parking lot, located at 15250 Desman Road in La Mirada, which adjoins Coyote Creek Channel to the southeast and Parcel 1 to the southwest. The property is developed with an industrial warehouse structure.
- TCE 2: Approximately 0.4 acre of the landscaped and surface parking lot, located at 7651 Stage Road, which adjoins Parcel 2 to the west.

Parcel History

Parcel 1 and the property located at 5650 Dolly Avenue was undeveloped as early as 1896 until the development of the warehouse structure by 1982. TCE 1 and the property located at 15250 Desman Road appeared developed in its current configuration by 2005.

Parcel 2, TCE 2, and the properties located at 7651 Stage Road and 5301-5333 Beach Boulevard were undeveloped as early as 1896 until the development of a portion of the current retail shopping center by 1975 and the current multi-family residences by 1982. Additional structures were built at the retail shopping center by 2005.

Environmental Databases

Citadel utilized Environmental Database Resources, Inc. (EDR) as an information for regulatory agency database records. The property located at 5650 Dolly Avenue was identified on the following environmental databases: LUST, CORTESE, HIST CORTESE, WDS, UST, SWEEPS UST, CERS, CERS HAZ WASTE, CA FID UST, CERS TANKS, NPDES, CIWQS, and RCRA-SQG. A diesel leak was discovered at the property in December 1989 during closure of three 10,000-gallon underground storage tanks (USTs). The case was completed and closed by the Orange County Health Care Agency (OCHCA) in May 1990. Based on reviewed documents, the location of the former USTs appeared to be closer to Dolly Avenue, which is approximately 0.24 mile west-southwest of Parcel 1. Based on the case closure and distance from the Site, the leaking underground storage tank (LUST) is not expected to represent an environmental concern to the Site.

The address 15250 Desman Road was not identified in the reviewed environmental databases. The addresses 7651 Stage Road and 5309 Beach Boulevard (the nearest structure at the retail shopping center) were also not identified in the reviewed environmental databases.

Citadel reviewed information provided by EDR regarding nearby properties to evaluate for potential on-Site vapor encroachment concerns from off-site sources. According to EDR, no historical releases of petroleum products from a leaking underground storage tank (LUST) occurred within 0.25-mile and upgradient of the Site. EDR also provided the listings on the Historical Gas Station and Dry Cleaners databases within 0.25-mile radius of the Site. Two properties were identified on the Historical Cleaners as within 0.125 mile; however, these properties were not located within 100 feet of the Site. None were identified on the Historical Gas Station databases as within 0.125 mile.

Based on Citadel's understanding of the Project and the updated crossing methods, no additional environmental concerns were identified in relation to the updated crossing methods, two parcels and the two TCEs. No mitigation is required regarding hazards or hazardous materials due to the project updates described in this supplemental technical memo.

If after your review of this letter report, you have any questions or require additional information, please do not hesitate to telephone our office at (818) 246-2707.

Sincerely,
CITADEL EHS

Shirley Lee

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of

EXECUTIVE SUMMARY

assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 04/27/2021 has revealed that there are 2 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 03/22/2021 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 03/22/2021 has revealed that there is 1 RCRA-TSDF site within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/22/2021 has revealed that there are 7 RCRA-SQG sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 04/23/2021 has revealed that there are 8 ENVIROSTOR sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 7 UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/22/2021 has revealed that there are 13 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GENERAL CLINICAL PLASTICS CORP. (Continued)

S106387221

RB Case Number: 2040220
File Location: Regional Board
Potential Media Affected: Soil
Potential Contaminants of Concern: 1,1,1-Trichloroethane (TCA), Other Chlorinated Hydrocarbons, Tetrachloroethylene (PCE), Trichloroethylene (TCE), Gasoline, Waste Oil / Motor / Hydraulic / Lubricating
Site History: Chemicals of Concern (COCs) in soil identified during February 2002 sampling included trichloroethene (TCE), PCE, cis-1,2-DCE, DCE, acetone, 2-Butanone (MEK), benzene, toluene, ethylbenzene, xylenes (BTEX), total petroleum hydrocarbons as diesel (TPHd), waste oil, barium, copper lead, molybdenum, selenium, vanadium, and zinc. Although other hydrocarbons, mineral solvents and metals were present in low concentrations in the soil column, initial groundwater results showed concentrations to be at or below EPA Region 9 tap water maximum levels (PRGs) and state Maximum Contaminant Levels (MCLs). Four groundwater monitoring wells were installed and sampled during the April 2002 assessment. Cis-1,2-DCE was detected in two wells at concentrations of 73 pg/L (MW01) and 5.8 pg/L (MW02). PCE was detected in MWO4 at a concentration of 5.9 pg/L. The groundwater flow direction ranged from eastward to east-northeastward at a gradient ranging from approximately 0.0003 ft/ft to approximately 0.0005 feet per foot (ft/ft). Low concentrations of Cis-1,2-DCE (5.1 to 95 ug/l in MW-02 and MW-01 respectively) and PCE (5.8 to 11 ug/l in MW-04, the down gradient well) have been consistently found in three wells over two years of monitoring without a significant change in concentrations. The presence of degradation product of PCE, cis 1,2 DCE, indicates a continued biologic breakdown of PCE, which is already at concentrations just above State Maximum Contaminant Levels (MCL) for drinking water. Clearly the site is stabilized in relation to the growth of a contaminant plume and entering a stage of reduction in size and concentration. The plume does not appear to extend offsite in concentrations above MCLs.

Large Quantity Generators are required to dispose of hazardous waste within 90 days of accumulation start. CORRECTIVE ACTIONS: Dispose waste absorbent using a registered hazardous waste hauler and provide manifests to the agency within 30 days. Continue to dispose hazardous waste within 90 days of accumulation.

Violation Division: Orange County Environmental Health
Violation Program: HW
Violation Source: CERS

Site ID: 139224
Site Name: O'Reilly Auto Parts #2812
Violation Date: 09-24-2019
Citation: 22 CCR 15 66265.173 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.173

Violation Description: Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.

Violation Notes: Returned to compliance on 09/24/2019. Observed tank of waste oil open when not adding or removing waste. Manager closed built-in lid of tank during on site inspection. Violation corrected on site.

Eval General Type: Compliance Evaluation Inspection
Eval Date: 09-24-2019
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site for routine hazardous materials and business emergency plan inspection. The inspection was conducted with John Driskill, facility manager. Observed the facility and inspected hazardous materials storage. The following materials were observed in amounts that meet or exceed the minimum volumes required for disclosure: - Waste oil CERS updated and complete for 2019. Business emergency plan available for review. Plan accepted. Training records available for review. Records accepted. No hazardous materials program violations observed during on site inspection.

Eval Division: Orange County Environmental Health
Eval Program: HMRRP
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 09-24-2019
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site for a routine hazardous waste inspection. Consent to inspect and take any necessary photos was given by John Driskill, facility manager. Walked throughout the facility. Observed hazardous waste storage areas. Containers were properly labeled. Manifests were available and reviewed. Waste hauled approximately every week. Facility is a Non-RCRA LQG due to waste oil disposal. Training records are on site within the facility computer system. Training records include name of employee, job title, job description, and training frequency. All required information is held on facility computer. Emergency plan is posted in back store room. No hazardous waste or universal waste observed in the dumpster/enclosure area.

Eval Division: Orange County Environmental Health
Eval Program: HW
Eval Source: CERS

Eval General Type: Other/Unknown
Eval Date: 09-30-2019
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: In office for off site re-inspection following routine inspection. Facility manager has provided manifests for waste absorbent removal to the agency via text. Manifests document the removal of the waste oil absorbent that had accumulated for greater than 90 days on site. Manifest reviewed and accepted by regulator. Violation I472 corrected.

Violation Date: 11-15-2014
Citation: HSC 6.95 25508(d) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(d)
Violation Description: Failure to complete and/or electronically submit a business plan when storing/handling a hazardous material at or above reportable quantities.
Violation Notes: Returned to compliance on 01/14/2015. Orange County Environmental Health as the Certified Unified Program Agency (OC CUPA) is the administrating agency for the Hazardous Materials Disclosure and Business Emergency Plan programs (HMD/BEP) previously administered by the Orange County Fire Authority. During the months of August and December of 2013, the OC CUPA sent out letters to regulated businesses requesting them to electronically submit their HMD/BEP forms. Electronic submission of these forms is a legal requirement. Failure to submit HMD/BEP forms is in violation of the California Health &

Evaluation:

Eval General Type: Compliance Evaluation Inspection
Eval Date: 01-20-2016
Violations Found: No
Eval Type: Routine done by local agency

Eval Notes: On site to conduct an inspection of this facility with regards to the Hazardous Materials Business Emergency Program. Consent to inspect and take photos of the facility was provided by the store Manager Yong Diakim. This facility is responsible for identifying all hazardous materials and hazardous wastes, which are above the disclosure thresholds. Reporting thresholds for hazardous substances stored at the facility are 500 pounds of solids or 55 gallons of liquid or 200 cubic feet of gas. Hazardous wastes should have a separate disclosure. The facility was observed with the following Hazardous Materials and Hazardous Wastes being stored at the site. HM -Propane 3x7 gallon cylinders - Refrigerant gases (Foran 404a) Please refer to the Orange County CUPA website at <http://occupainfo.com/programs/hm> for further assistance. The facility is required to electronically submit the following documents through either website: CERS or the E Submit Portal: - [Truncated]

Eval Type: Other, not routine, done by local agency
Eval Notes: In office for off-site re-inspection. Facility uploaded a submittal to CERS. Business activities and information, hazardous materials inventory, site map, and emergency response and contingency plan have been reviewed and are accurate for the facility. CERS submittal has been accepted for 2019. Violation I292 has been corrected.

Eval Division: Orange County Environmental Health
Eval Program: HMRRP
Eval Source: CERS

Eval General Type: Other/Unknown
Eval Date: 07-18-2016
Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: For your chemical "R-404a" for your maximum daily amount, it should be at least the size of your largest container, for your average daily amount it would be the average daily amount you have stored on-site. For example, if you have three 55 gallon drums of a chemical, your largest container size would be 55, your maximum daily amount would be 165 gallons, and your average daily amount would probably be around 90 gallons. Also, will you please add a CAS# for each of the mixture components. Also, please add Propane to your submission. For your emergency response completely fill out sections c. through f., For your employee training program, you should have an annual training for safety and evacuation procedures. Please update your site map to include electrical, gas, and water shutoffs, emergency staging area, chemical location, and location of emergency response equipment. If you have any questions please contact me at anesbit@ochca.com or 714-640-4249. Thank [Truncated]

Environmental Interest/Information System:

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CERS:

Name: CHEVRON STATION #98873/1865
Address: 5241 BEACH BLVD
City,State,Zip: BUENA PARK, CA 90621
Site ID: 104974
CERS ID: 10441627
CERS Description: Chemical Storage Facilities

Violations:

Site ID: 104974
Site Name: Chevron Station #98873/1865
Violation Date: 04-23-2019
Citation: 23 CCR 16 2636(f)(2) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2636(f)(2)
Violation Description: Failure of the functional line leak detector (LLD) monitoring pressurized piping to meet one or more of the following requirements: Monitored at least hourly with the capability of detecting a release of 3.0 gallons per hour leak at 10 pounds per square inch and restrict or shut off the flow of product through the piping when a leak is detected.
Violation Notes: Returned to compliance on 04/23/2019. 87 LLD failed initial testing. LLD was repaired and passed retesting. Violation abated on site.
Violation Division: Orange County Environmental Health
Violation Program: UST
Violation Source: CERS

Site ID: 104974
Site Name: Chevron Station #98873/1865
Violation Date: 02-05-2016
Citation: HSC 6.7 25292(e) - California Health and Safety Code, Chapter 6.7, Section(s) 25292(e)
Violation Description: Failure to maintain secondary containment, as evidenced by failure of secondary containment testing.
Violation Notes: Returned to compliance on 08/25/2016. The 5/6 UDC failed the SB 989 testing. The notes indicated multiple tests failed due to bad entry fittings. Also, the 87 fill sump failed multiple tests due to bad entry fittings. Please submit a plan check for repair of the failed components to this Agency within 30 days. If there is a question regarding the necessity of plan check for certain repairs or modifications, please contact this Agency for clarification. Plan Check Fees and the Facility Modification Application can be found at www.occupainfo.com Please schedule the retest for the failed components within 30 days. Notify this Agency at least 48 hours prior to the testing event.

1006805251

Site ID: 104974
Site Name: Chevron Station #98873/1865
Violation Date: 09-17-2013
Citation: HSC 6.7 25299(a)(9) - California Health and Safety Code, Chapter 6.7, Section(s) 25299(a)(9)
Violation Description: Leak detection equipment disabled or tampered with in a manner that would prevent the monitoring system from detecting and/or alerting the owner/operator of a leak.
Violation Notes: Returned to compliance on 10/17/2013. The 87 annular Veeder Root 409 sensor and the 91 STP VR 208 sensor did not operate properly when tested. The tester replaced the sensors during this test and retested them. The sensors passed the retest. This is proof of compliance, therefore this violation was abated today.
Violation Division: Orange County Environmental Health
Violation Program: UST
Violation Source: CERS

Site ID: 104974
Site Name: Chevron Station #98873/1865

Citation: 23 CCR 16 2715(c)(4) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2715(c)(4)
Violation Description: Failure to maintain a list of employees trained by the designated operator on-site or off-site at a readily available location, if approved by the UPA. For training that occurs on or after October 1, 2018, failure to maintain a copy of the "Facility Employee Training Certificate" on-site or off-site at a readily available location, if approved by the UPA.
Violation Notes: Returned to compliance on 07/27/2020. Training records for employees is not current for 2020, records do not indicate employees have been trained on UST regulations and management within the last 12 months. Provide a current training record to the agency within 30 days.

Eval Notes: On site for a routine hazardous waste inspection. Consent to inspect
and take any necessary photos was given by Jose, Manager. Walked
throughout the facility. Observed hazardous waste storage areas.
Containers were closed and properly labeled. Waste on site: - Waste
fuel and water - Waste absorbent - Waste fuel filters Manifests were
available and reviewed. Waste hauled approximately every 6 months.
Facility is a CESQG. Employees are reported to be trained. Emergency
plan is posted near cashier. No hazardous waste or universal waste
observed in the dumpster/enclosure area. No hazardous waste violations
were observed this inspection.

Eval Notes: INSPECTOR COMMENTS On site for routine UST inspection, monitoring system certification, and spill bucket testing. The facility has two double-walled tanks (87 and 91) monitored by a Veeder Root TLS-350R system. The monitor is operational for audible and visual alarms. Panel display reads G all functions normal. The site has double-walled pressurized piping. Positive shutdown and fail safe programming were verified. Flapper valves are used for overfill prevention. The sensors in the tank annulars (M# 409), turbine sumps (M#208), fill sumps (M#208), and UDCs (#208) shutdown the turbine when submerged in liquid. Both electronic line leak detectors (PLLDs) were tested with a simulated 3 gph test and were determined to be operational. The spill buckets were tested using a testing donut device. There was no indication of leakage at the end of the testing period. Testing was conducted by Jorge Hernandez of Tanknology. Tester certifications (VR, ICC, VMI) were [Truncated]

Eval Notes: Onsite to conduct routine UST inspection and hazardous waste inspection. Consent to inspect the facility was provided by the manager Fabiola Mar. The Monitoring System Certification testing was conducted by Dave Seeker of Tanknology. The following Observations were made: The facility has 2 USTs, one 91 and one 87 tank. To test each sensor in the fill sumps, STP sumps, and UDCs, the sensors were submerged in water. The sensors functioned properly and the turbines were shut off when the sensors were submerged. When the sensors were removed from the water, the turbines returned to normal function except for the 91 STP sump (see violation). The VR 208 sensor in the 91 STP initially failed testing, the sensor was replaced like for like during this test and was retested with passing results. The 91 annular sensor passed testing, however the 87 annular sensor failed testing (see violation). The tester replaced the 87 annular VR 409 sensor like for like during this test and [Truncated]

Eval Type: Other, not routine, done by local agency
Eval Notes: The following email correspondence occurred due to clarification of reporting hazardous substances in CERS. Hi Erin Yes, the CO2 and Propane can be reported in gallons but is regulated at the state in which it would be when released. Example; a propane cylinder on a fork lift holds about 7 gallons of propane liquid. When the propane is released to the atmosphere, it turns to a gas immediately and releases approximately 238 cuft. of propane gas. So, propane is reported at 7 gallons because when released to the atmosphere the stored volume of propane liquid is about 238 cuft. 238 cuft > 200 cuft and therefore the 7 gallon propane bottle is regulated and must be reported in the disclosure. I think we have said the same thing. So, yes the CO2 at the Chevron station in Buena Park is stored at a regulated volume for reporting and can be reported in gallons. I hope this helps. Eval Notes: On-site to conduct a routine UST inspection during the annual monitoring system certification. Francisco Castro of Tanknology provided the following certifications: Veeder-Root tech #B37663 exp. 2/1/17, ICC tech #8026747 exp. 8/3/17, VMI #3411 exp. 9/10/15. The manager, Fabiola Mar was also present during this inspection. There are 2 tanks and 4 dispensers at this site. VR-208 sensor were in use in all of the fill and STP sumps and UDCs. Overfill prevention is provided by flapper valves in each drop tube as well as ATGs connected to an outside annunciator. VR-409 wrap-around sensors were in use in the dry tank annulars. The leak detectors are electronic (PLLDs). The system is monitored by a Veeder-Root TLS-350R panel. The following documents were reviewed: DO monthly reports DO training 8/6/15 Monitoring Plan, Response Plan, Facility Info page, Tank Info pages 2/18/14 (CERS #10441627) Site map Monitor Cert 9/10/14 SB989 1/25/13 Permit No UST violations [Truncated]

Eval Notes: INSPECTOR COMMENTS: On site to witness annual monitor certification and to conduct the annual routine inspection. Met with Yoni Mendoza this date. The Tanknology Technician has ICC Certification and current Veeder-Root Certifications. The two (2) gasoline tanks use flappers for the overfill. Inspected all four (4) sumps and all four(4) UDCs. All appear to be dry and the sensors were located at the lowest point. Documents available on-site and on CERS: 1) Leak response plan 2) Monitoring plan 3) Monitoring Plot Plan 4) Maintenance and Testing records: 5) Designated Operator monthly inspection reports.-- Alarm history is attached 6) Financial Responsibility coverage period 4/28/14 The current UST permit and training records are on-site. Verified the CERS submission this date.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Eval Notes: On site for routine UST inspection, monitoring system certification and spill bucket testing. - The facility has two double walled fiberglass tanks (87, 91) monitored by a VR TLS 350. Positive shutdown and fail safe programming were verified. Flapper/Fill tube shutoff valves are used for overfill prevention. - The site has double-walled pressurized piping with mechanical line leak detectors. Line leak detectors were tested and determined to be functional. - The turbine, fill sensors were tested hydrostatically. The turbine and UDC sensors shut down the turbines when submerged in fluid. Tank annulars are dry and monitored by VR 409 sensors. Tank sensors alarmed and shut down respective turbines when submerged in liquid for all tanks. UDCs monitored by float and chain, flow shuts off when liquid is present in UDC, all UDCs passed inspection - The spill buckets were visually tested for one hour and all passed. - Overfill prevention tested on 05/13/19. Overfill must [Truncated]

and spill bucket testing. The facility has two double-walled tanks (87 and 91) monitored by a Veeder Root TLS-350 system. The monitor is operational for audible and visual alarms. Panel display reads G all functions normal. The site has double-walled pressurized piping. Positive shutdown and fail safe programming were verified. Flapper valves are used for overfill prevention. The sensors in the tank annulars (M# 409), turbine sumps (M#208), fill sumps (M#208), and UDC (float and chain) shutdown the turbine when submerged in liquid. Both mechanical line leak detectors (petro) were tested with a simulated 3 gph test and were determined to be operational. The spill buckets were visually tested for 60 minutes. There was no indication of leakage at the end of the testing period. Testing was conducted by Dave Simon of ShanCor. Tester certifications (VR, ICC, VMI) were verified. Certification stickers [Truncated]

Eval Notes: Onsite to conduct routine UST inspection. The Monitoring System Certification testing was conducted by Dave Simon of Shancor. His Certifications and Licenses are current and valid (ICC 8191470 exp 12-5-17; VR B36208 exp 3-13-18; VMI 1758 exp 8-9-16) . The Veeder-Root TLS-350 monitoring panel displayed "all functions normal" and audible and visual alarms were demonstrated operational. The panel was noted marked with a sticker from the most recent monitoring certification (6/18/15). The following Observations were made: The facility has 2 USTs that utilize Flapper valves for overfill protection and 4 UDCs that use Chain and Float mechanisms for monitoring UDCs. The Chain Float were all tested using water and passed testing. The fill side spill buckets passed a visual hydrostatic test. All sensors were tested and passed. The Leak Detectors both passed testing. The test boots of the piping was pulled back allowing the interstitial space of the piping to be [Truncated]

Eval Notes: This is an in-office inspection report to document the CERS review conducted today. The ownership designation in CERS is wrong. The Ownership is Parkland Enterprises Inc. and not Peter Park. The monitoring Plan is wrong with regards to the UDC monitoring (see violation). UDC Leak Alarm Triggers Automatic Pump Shutdown is marked yes and the site has Chain Floats and a leak doesn't shut down the turbine. Please mark this box No for both Tanks. The CERS submittal was not Accepted today.

Eval Notes: Onsite to conduct routine UST inspection. The Monitoring System Certification testing was conducted by Dave Simon of Shancor (ICC 8191470 exp 12-7-15; VMI 1758 exp 8-7-14; VR B36208 3-6-16) The Veeder-Root TLS-350 monitoring panel displayed "all functions normal" and audible and visual alarms were demonstrated operational. The panel was noted marked with a sticker from the most recent monitoring certification (6/17/13). The following Observations were made: The facility has 2 x 15K USTs (87 and 91 grades) with 4 UDCs. Flappers are used for overfill. The test boots for the primary and secondary piping were observed pulled backed and in communication with the STP sump sensors. As per Mr. Simon, all components tested today received a pass. The following documents were available for review on this date:
- Permit - Monitoring plan (NOTE: Section IV regarding the UDC Monitoring ins missing information on the onsite copy) - Monitoring plot plan - Designated [Truncated]

Eval Notes: A routine Hazardous Materials inspection was conducted today. The Cashier Fabi Perez provided consent to inspect. A review of the CERS electronic reporting was also conducted today (10411210). A tour of the facility was provided by Harry. The facility had the following Hazardous Substances being stored at the facility : -Extra Heavy Duty Upholstery Cleaner -Rainbow wax -Wheelbrite blue tire cleaner -Sealer wax -Car wash hot and cold wax -water base engine degreaser -Glass cleaner concentrate -Maxi suds -Rubber life dressing compound -New Car glaze dressing compound -CO2 -Unleaded Gasoline NOTED: - The volume of used filters and gasoline contaminated solids is not over 500 lbs and therefore isn't required to be disclosed. Please remove this from the CERS Hazardous Materials Inventory. - The cleaners and soaps disclosed all have CAS # listed in CERS, however they also indicate each of these chemicals are mixtures. Mixtures should not have CAS #'s [Truncated]

Eval Type: Routine done by local agency
Eval Notes: On site to witness the SB 989 testing being conducted and I also conducted a routine hazardous waste inspection. Consent to inspect and take photos at the facility was provided by Peter Park. The facility was previously in the Hazardous Waste Program. Today 2 x 55 gallon drums designated for the storage of hazardous waste was observed in the municipal dumpster area. Mr. Park provided a copy of the last disposal of 150 lbs of waste flammable solids on 7/30/14. This is proof that the facility is generating hazardous waste at the site. The facility will be routinely inspected for the following hazardous waste management practices: -All hazardous waste containers must be properly labeled with the words "hazardous waste", waste name, owner information, hazardous property, physical state and accumulation date. -All hazardous waste containers must be closed at all times. -All hazardous waste must be properly disposed using a State registered hauler. -Facility has [Truncated]

Eval Notes: On site to conduct a routine hazardous waste inspection. Consent to inspect and take photos at the facility was provided by Fabi Perez the Cashier. The facility has recorded in the Monthly DO reports that the liquid alarms after a rain event are being mitigated by pumping out the liquid and disposing of it to the onsite clarifier. I discussed with an employee Harry to ensure that only liquid that is non hazardous maybe disposed of through the clarifier. The facility did not have any waste liquids stored on site at this time but did have a 55 gallon drum designated for the storage of the waste gasoline contaminated solids. Municipal dumpster area does not contain any hazardous waste. The perimeter of the facility was also inspected; no signs of releases were noted. Emergency Response Information was complete. Hazardous waste containers were properly labeled and covered. Reviewed manifests, bills of lading and consolidated manifests for all hazardous waste [Truncated]

Violation Source: CERS

Site ID: 78951
Site Name: UNITED #038
Violation Date: 02-13-2014
Citation: HSC 6.7 29295 - California Health and Safety Code, Chapter 6.7, Section(s) 29295

Violation Description: Failure to record and/or report suspected or actual unauthorized release in appropriate time frame.
Violation Notes: Returned to compliance on 04/18/2014. Daily 0.2 gph CSLD test results indicated a G WarningG for Tank 1 (regular unleaded) on 12-26-13 and a G FailG on 10-28-13. No documentation regarding these failed test results were present or have been received by this Agency. Facility must monitor CSLD test results and diligently follow up/report all failed tests. A violation has been issued for failure to monitor, report and respond to failed CSLD test results. Ensure that the facility will provide adequate monitoring, follow up and reporting of failed test results.

Violation Division: Orange County Environmental Health

Site Name: UNITED #038
Violation Date: 02-11-2021
Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)

Violation Description: Failure to comply with one or more of the following overflow prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overflow prevention equipment that does not use flow restrictors on vent piping to meet overflow prevention equipment requirements when the overflow prevention equipment is installed, repaired, or replaced on and after October 1, - 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October- 1,- 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overflow prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overflow prevention equipment inspection for 36 months.

Violation Notes: Overflow prevention for 87, 91, and D tanks are set at an unacceptable limit. Flapper valves trigger at 97%, 96%, and 97% for the respective tanks. Flapper valves are not to be set higher than 95% of tank capacity. Drop tube valves must be re-installed to reach acceptable limits. Correctly install valves within 30 days and send results to the agency. Ball float valve for 87 tank could not be removed for testing during inspection. Remove ball float for testing and replace or remove entirely and send results to the agency within 30 days.

Evaluation:
Eval General Type: Compliance Evaluation Inspection
Eval Date: 02-11-2015
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site to conduct a routine hazardous waste inspection. Consent to inspect and take photos at the facility was provided by Cashier Maria Zuniga. I also spoke with the Manager Ceasar Corranza. The facility was involved in a merge of CF United OPCO LLC and APRO LLC on 7-1-14. A new EPA ID # (CAL000398667) was attained. The facility has a 55 gallon drum of gasoline contaminated solids and a 55 gallon drum of waste gasoline contaminated liquids. Municipal dumpster area does not contain any hazardous waste. The perimeter of the facility was also inspected; no signs of releases were noted. Emergency Response Information was complete. Hazardous waste containers were properly labeled and covered. Reviewed manifests, bills of lading and consolidated manifests for all hazardous waste streams. For further information about Hazardous Waste management, please refer to the Orange County Hazardous Waste website at www.occupainfo.com. No hazardous waste violations noted [Truncated]

Eval Notes: This Complaint is generated to track the SB 989 failures. SB 989 test results from test conducted on 9-6-16 by Jim Horne of Petroleum Tank Testing Inc. The facility has single walled tanks (87, 91, and Diesel) and 7 UDCs. The following components failed testing (violation I382 issued). - secondary piping of the #2 91 product failed testing - UDC #5/6 The comments sections stated: - Rinse water was left on site in labeled drum. Test water was retained. - These are single wall tanks - 91 product secondary pipe would not hold pressure. No visual leak could be found. Helium test needed to locate problem. - UDC 9/10 would not hold water. Investigation on penetration is needed. (Please note the site doesn't have a 9/10 UDC, the results did indicated the 5/6 UDC failed testing) All other components passed testing. A Modification application is required to complete the repairs to the failed components.

Eval Notes: On site for routine UST inspection, monitoring system certification and spill bucket testing. - The facility has three single walled steel/fiberglass tanks (87, 91, D) monitored by a VR350. Positive shutdown and fail safe programming were verified. Flapper tube valves and a ball float (87 only) are used for overfill prevention. - The site has double-walled pressurized piping with mechanical line leak detectors. Line leak detectors were tested and determined to be functional. - The turbine, fill, and UDC sensors were tested hydrostatically. The turbine and UDC sensors shut down the turbines when submerged in fluid. CSLD system runs tests several times per month for each tank. CSLD printouts kept in the UST binder. Printouts have passing results for each month. - The spill buckets were visually tested for one hour and all passed. - Overfill prevention tested today. Drop tube valves are set to high, activating at 96% to 97%. Overfill tubes must be corrected. Ball [Truncated]

 POTW: Not reported
 Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
 Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Violations:

Site ID: 410264
Site Name: STATES LOGISTICS SERVICES INC
Violation Date: 04-25-2018
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)

Violation Description: Failure to complete and electronically submit a site map with all required content.

Violation Notes: OBSERVATION: The annotated site map does not include the emergency shutoff switch for the biodiesel ASTs on the map, along with the location of the emergency response equipment (spill kits, fire extinguishers, etc.) storm/sewer drains (if present) and the entrance/exit points of the building. CORRECTIVE ACTION: Revise the annotated Site Map to include all required content and submit electronically in the California Environmental Reporting System (CERS).

Violation Date: 11-15-2014
Citation: HSC 6.95 25508(d) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(d)

Violation Description: Failure to complete and/or electronically submit a business plan when storing/handling a hazardous material at or above reportable quantities.

Violation Notes: Returned to compliance on 03/09/2016. Orange County Environmental Health as the Certified Unified Program Agency (OC CUPA) is the administrating agency for the Hazardous Materials Disclosure and Business Emergency Plan programs (HMD/BEP) previously administered by the Orange County Fire Authority. During the months of August and December of 2013, the OC CUPA sent out letters to regulated businesses requesting them to electronically submit their HMD/BEP forms. Electronic submission of these forms is a legal requirement. Failure to submit HMD/BEP forms is in violation of the California Health & Safety Code Chapter 6.95. According to our records there is no electronic submission for this facility. Please go to www.esubmit.ocgov.com to request a username and password and submit your HMD/BEP forms within the next 30 days. Businesses may also submit forms via the California Environmental Reporting System. Please verify that all owner information that is prepopulated on the E-Submit Portal is still [Truncated]

Evaluation:

Eval General Type: Compliance Evaluation Inspection
Eval Date: 02-11-2016
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site to conduct a routine Hazardous Materials Business Emergency Plan inspection. Consent to inspect and take photos was provided by Greg Scott. A walk through of the facility was conducted. The following Hazardous Substances were observed being stored at above the reporting threshold: HM - Bio-diesel (2x6000 gallon APSTs) - Diesel Emission Fluid (270 gallon tote) - Propane 12 x 7 gallon cylinders
This facility is responsible for identifying all hazardous materials and hazardous wastes, which are above the following disclosure thresholds: Solids > 500 pounds. Liquids > or = 55 gallons Gas > or = 200 cubic feet Site map appears to be accurate. Employee training is complete. Documentation is available for review of new employee training and an annual refresher training specific to the HMBEP. Electronic Reporting has been submitted and completed using the E Submit Portal.. Further review of the electronic submission will be conducted. Please refer to the [Truncated]

Eval Notes: States Logistics Services Inc. 5650 Dolly Ave Buena Park, CA 90621 FA0044178 Facility contact : Greg Scott (714-349-9356, email gscott@stateslogistics.com) Onsite to conduct a new Aboveground Petroleum Storage Tank inspection. I met with Greg Scott and he provided consent to inspect and take photos. The facility has 2 x 6,000 gallon Biodiesel tanks. The tanks are both double walled and the tanks have a concrete containment around the outside to the tanks. The total volume of Petroleum stored on site is 12,000 gallons. Therefore an SPCC plan is required to be completed by Professional Engineer (PE). A copy of the SPCC was available for review, ensure it has been completed and stamped by a PE. Weekly inspections are conducted and the log was available for review. Training is also completed. This facility will be inspected for the APST every 3 years. No APST violations noted. Thank you .

Violations:

Site ID: 411363
Site Name: Amazon.com Services, LLC - DLA2
Violation Date: 02-16-2021
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 02/16/2021. Waste drum label was missing hazard characteristic info. Manager corrected label during inspection. Violation corrected on site.
Violation Division: Orange County Environmental Health
Violation Program: HW
Violation Source: CERS

Evaluation:

Eval General Type: Compliance Evaluation Inspection
Eval Date: 02-16-2021
Violations Found: Yes
Eval Type: Routine done by local agency
Eval Notes: On site for a routine hazardous waste inspection.- Consent to inspect and take any necessary photos was given by Chequetta Dillard, site manager. - Walked throughout the facility.- Observed hazardous waste storage areas.- Containers were closed and properly labeled after corrections. - Waste observed on site: - Returned consumer waste - 55gal lab packs - Manifests were available and reviewed. Waste hauled approximately every year. Facility is a CA very small quantity generator. - Employees are reported to be trained. - Emergency plan is

posted near HW consolidation area. - No hazardous waste or universal waste observed in the dumpster/enclosure area. -
Eval Division: Orange County Environmental Health
Eval Program: HW
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 11-15-2018
Violations Found: No
Eval Type: Routine done by local agency
Eval Notes: On site for a routine hazardous waste inspection. Consent to inspect and take any necessary photos was given by Pinckney Griffen, Manager. Walked throughout the facility. Observed hazardous waste storage areas. Containers were closed and properly labeled. Containers were empty, facility's only hazardous waste are retail products that are broken and as of 11/15/18 no hazardous waste items have been collected. Manifests were unavailable since the facility was opened in April of 2018 and there have been no hazardous waste pickups for the facility. Employees are reported to be trained. Emergency plan is posted in office. No hazardous waste or universal waste observed in the dumpster/enclosure area. No hazardous waste violations were observed this date. Performed SR in order to enter facility into EC.

Eval Division: Orange County Environmental Health
Eval Program: HW
Eval Source: CERS

Eval General Type: Compliance Evaluation Inspection
Eval Date: 12-26-2018
Violations Found: No
Eval Type: Industrial Storm Water Compliance Evaluation
Eval Notes: Regional Board staff conducted a No Exposure Certification inspection of the above facility on December 26, 2018. The yard did not have any exposed materials and thus is currently in compliance with the No Exposure Certification requirements as identified in the Industrial General Permit.

This facility is also known as Parker Chemical and Hooker Chemical. The facility produced chemical specialty products for metal treating, metal drawing lubricant, and rust resisting compounds. The facility received an ISD on 12/23/81. An ownership change took place on 10/19/83 and revised Part A application was submitted. During 1983 and 1984 the facility pursued a Part B permit. DTSC produced a draft permit and it was public noticed on 6/1/84. However, Part B permit was never issued for this facility and facility went to closure on 9/20/88. The closure notification letter of 9/20/88 stated that after further evaluation of their operation and regulation amendments, it was concluded that facility should be regulated as Generator not TSDF. The facility went through closure during 1988-1989 and was verified closed on 7/6/92. There were no corrective action related documents in the file.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CA BOND EXP. PLAN:	BACKLOG SITE CLEANUP PLANNING REPORT
Responsible Party:	
Project Revenue Source Company:	Not reported
Project Revenue Source Addr:	Not reported
Project Revenue Source City,St,Zip:	Not reported
Project Revenue Source Desc:	The site is projected for cleanup by responsible parties with reimbursement to DHS for staff and related costs. However, if the responsible parties fail to provide funding another source of funds will need to be established.
Site Description:	Leeder Chemical is a formulating and packaging facility for specialty chemical products.
Hazardous Waste Desc:	The hazardous wastes present include methyl ethyl ketone (MEK), trichloroethylene (TCE) and 1,1,1-trichloroethane (TCA). These and other contaminants have been detected in the soil and in the ground water.
Threat To Public Health & Env:	The primary concerns are contamination of surface and ground water. Coyote Creek runs adjacent to the site, joins the San Gabriel River, and empties into the Long Beach Harbor area. The depth to ground water in the shallow aquifer is 13 feet and 60 to 70 feet in the deeper aquifer. The shallow and deeper aquifers are believed to be hydraulically connected. There are at least 84 wells within one mile of the site which are used for industrial purposes. Ground water extraction and treatment systems have been installed under direction of DHS and the RWQCB and have been operational for two and one half years.
Site Activity Status:	Leeder Chemical is conducting the remedial action under Order No. 85-54 from the RWQCB. A ground water extraction and treatment system has been operational since October of 1985. Ground water monitoring is continuing under the oversight of RWQCB with a review of data by DHS.

TSCA SUBMITTER
AIR EMISSIONS CLASSIFICATION UNKNOWN
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.
US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
HAZARDOUS AIR POLLUTANT MAJOR
STATE MASTER
SSTS (Section Seven Tracking System) evolved from the FIFRA and TSCA Enforcement System (FATES). SSTS tracks the registration of all pesticide-producing establishments and tracks annually the types and amounts of pesticides, active ingredients, and related devices that are produced, sold, or distributed each year.

Local Agency: Not reported
RB Case Number: 0698
File Location: Regional Board
Potential Media Affected: Not reported
Potential Contaminants of Concern: Not reported
Site History: The Site comprises of two connected office, warehouse, and operation structures that were formerly used for mixing and blending of specialty chemicals including halogenated volatile organic compounds (VOCs). According to the information provided, several Site investigations were conducted beginning in 1983. The investigations included installation of 53 soil borings and 11 groundwater monitoring wells at the Site. The analytical results confirmed that soil and groundwater beneath the Site are impacted with VOCs and petroleum hydrocarbons. A total of 10 underground storage tanks (USTs) identified as potential sources were either removed or abandoned in place, filled with cement slurry, and the use of chlorinated solvents was also discontinued since 1990. As part of the remediation effort, a groundwater collection gallery was installed and operated from 1985 to 1996. The Site is located in the Central Groundwater Basin of the Coastal Plain of Los Angeles. Based on the soil boring logs, the soil beneath the Site consists of primarily silty clay, clayey silt and fine grained sand. Groundwater was encountered at 16 feet below ground surface (bgs) at the Site. The shallow groundwater encountered at the Site is part of the perched and semi-perched alluvial deposits underlain by the Bellflower aquiclude which are in turn underlain by the Artesia and Gage aquifers. The shallow groundwater flow is toward the northwest.

equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1, 2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October 1, 2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.

Violation Notes: Returned to compliance on 07/19/2019. OBSERVATION: No overfill test results were available for review. CORRECTIVE ACTION: Please test the flappers on site and make sure that they are functional. Overfill equipment need to be tested every three years and test results need to be maintained on site.

Violation Division: Orange County Environmental Health
Violation Program: UST
Violation Source: CERS

Site ID: 393637
Site Name: Galaxy Artesia
Violation Date: 07-23-2020
Citation: 23 CCR 16 2637(f) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2637(f)

Violation Description: Failure to submit a copy of the secondary containment test results on the G Secondary Containment Testing report FormG to the UPA within 30 days after the test.

Violation Notes: Returned to compliance on 07/23/2020. Facility had not sent test report to the agency within 30 days of the monitor certification test. Testing company provided test report via email. Report reviewed and accepted. Violation corrected on site.

Violation Division: Orange County Environmental Health
Violation Program: UST
Violation Source: CERS

Site ID: 393637
Site Name: Galaxy Artesia
Violation Date: 03-26-2019
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)

Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.

Violation Notes: Returned to compliance on 03/26/2019. Observed four 5 gallon buckets of waste absorbent without label. Operator was provided with label and attached label to wall of hazardous waste storage near buckets of absorbent. Label was marked with all required information. Violation corrected on site.

Violation Date: 04-05-2016
Citation: HSC 6.7 25292(e) - California Health and Safety Code, Chapter 6.7, Section(s) 25292(e)
Violation Description: Failure to maintain secondary containment, as evidenced by failure of secondary containment testing.
Violation Notes: Returned to compliance on 07/03/2017. The secondary containment testing results indicated the secondary lines of the 91 grade fuel failed testing. Please submit a plan check for repair of the failed components to this Agency within 30 days. If there is a question regarding the necessity of plan check for certain repairs or modifications, please contact this Agency for clarification. Plan Check Fees and the Facility Modification Application can be found at www.occupainfo.com Please schedule the retest for the failed components within 30 days. Notify this Agency at least 48 hours prior to the testing event.

Violation Date: 03-26-2019
Citation: 23 CCR 16 2716(e) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2716(e)
Violation Description: For designated operator (DO) monthly inspections conducted before October 1, 2018, failure to comply with one or more of the following requirements: Be performed by an ICC certified DO. Inspect monthly alarm history report, check that alarms are documented and responded to appropriately, and attach a copy. Inspect for the presence of liquid/debris in spill containers. Inspect for the presence of liquid/debris in under dispenser containment (UDC) and ensure that the monitoring equipment is positioned correctly. Inspect for liquid or debris in containment sumps where an alarm occurred with no service visit. Check that all testing and maintenance has been completed and documented. Verify that all facility employees have been trained in accordance with 23 CCR 2715(c). For designated operator (DO) 30 day inspections conducted on and after October 1, 2018, failure to conduct the designated UST operator visual inspection at least once every 30 days.
Violation Notes: Returned to compliance on 03/26/2019. Observation: DO inspection was not completed for March 2019. DO inspection reports were not signed by the owner/operator for the months of January and February 2019. Corrective Action: Please complete the DO inspection reports every 30 days. Please ensure the owner/operator signs the bottom of the inspection report within 48 hours. This violation was corrected today as the operator was on site and performed the inspection for March 2019.

Eval Notes: On site for routine hazardous materials and business emergency plan inspection. The inspection was conducted with facility cashier. Observed the facility and inspected hazardous materials storage. The following materials were observed in amounts that meet or exceed the minimum volumes required for disclosure: - Gasoline - Diesel - Propane Employee training is in UST binder and was available for review. Training records are acceptable for facility. Business emergency plan is on site and available for review. Plan is acceptable for facility. CERS submittal includes 3,697 cubic feet of CO2. CO2 on site was observed to be approximately 300 cubic feet. Correct or remove CO2 from CERS submittal. No hazardous materials program violations were observed while on site.

Eval Notes: The facility has three double-walled tanks (87, 91, D) monitored by a Veeder Root TLS-350R system.- Positive shutdown and fail safe programming were verified.- Flapper valves are used for overflow prevention. The site has double-walled pressurized piping with mechanical line leak detectors, and were tested and functional. The annular sensors, sump sensors, fill sensors and UDC alarmed and shut down respective turbines when submerged in water for all tanks and UDCs. The spill buckets were visually tested for one hour and they all passed. Overflow test reports were not present on site. - Testing was conducted by Edgar Arroyo of Clean Air Testing. Tester certifications (VR, ICC, VMI) were verified.- Please submit the test reports to this Agency within 30 days. - Secondary containment testing was last conducted on 3/22/2016.- It must be tested every 36 months.- The tester were performing the secondary containment test today after the annual monitoring system [Truncated]

Eval Notes: On site to witness the post cold start Monitoring System Certification and the post construction MC for SR0128731 and SR0128251. Steven Loerea of Clean Air testing Inc. conducted the test. His Certifications and Licenses are current and valid. The facility has 3 USTs, one Diesel, one 91 and one 87 tank. The facility has VR 208 sensors in the fill sumps, STP sumps, and the 5/6, 11 and 12 UDCs, the sensors were submerged in water. The sensors functioned properly and the turbines were shut off when the sensors were submerged. The turbines returned to normal function when the sensors were removed from the water. The tank annulars have VR 409 sensors. All sensors tested today received a pass. The overfill protection utilizes Flapper Valves. Fail safe and sensor out was tested and initiated positive shut down of the turbines. All components tested received a pass. .

Eval Type: Routine done by local agency
Eval Notes: On site for follow-up inspection for missed routine monitor certification test due to COVID-19. Met with site manager Carmen and observed UST documents on site. Reviewed facility's required UST documents: CERS tank pages: current Site map/plan: current Spill response: current CFR: current, expires 01/02/21 Statement of understanding and compliance: current DO form: current Training: current DO reports: all complete and completed within 30 days Permit to operate: current Facility provided test report from 03/31/20 via email: The facility has three double walled fiberglass tanks (87, 91, D) monitored by a VR350. Positive shutdown and fail safe programming were verified. Fill tube valves are used for overfill prevention. - The site has double-walled pressurized piping with mechanical line leak detectors. Line leak detectors were tested and determined to be functional. - The turbine, fill, and UDC sensors were tested hydrostatically. The turbine sensors [Truncated]

Eval Notes: SR0128731 This plan check is for the addition of 2 Diesel UDCs to the facility. The Contractor is Jorge Corona of Corona Fueling and Electric. 4 sets of plans were submitted along with Contractor Licenses and Certificates for the components being used. The scope of work includes excavating around the existing Diesel UDC on the south side of the facility. One of new dispensers will be tied into the main Diesel dispenser and the other dispenser will be tied into the second dispenser so the piping will be in a series. New sensors will be installed in the UDCs and programed into the Veeder Root. Schedule the Primary piping inspection and the Secondary Piping inspection. A final inspection will be conducted to verify the proper monitoring of the new dispenser and piping. Ensure all testing is scheduled through this agency and allow 48 hrs notification prior to the testing. This plan is Approved. The contractor was called (562-762-8492) and [Truncated]

Violations Found: No
Eval Type: Other, not routine, done by local agency
Eval Notes: Erdman was onsite to inspect the primary piping. Jorge Corona was onsite and we discussed the progress. Photos were taken. The primary piping was installed in a trench from the existing Diesel UDC to a Satellite UDC and then over from the Satellite UDC to another Satellite UDC. The Primary piping held pressure at around 60 psi for over 1 hr. The piping connections were inspected. Soap water was used on the connections and no bubbles were observed. The primary piping passed testing today. We scheduled an inspection for the secondary piping the next day.

current and valid. The facility has 3 USTs, one Diesel, one 91 and one 87 tank. The facility has VR 208 sensors in the fill sumps, STP sumps, and the 5/6, 11 and 12 UDCs, the sensors were submerged in water. The sensors functioned properly and the turbines were shut off when the sensors were submerged. The turbines returned to normal function when the sensors were removed from the water. The tank annulars have VR 409 sensors. All sensors tested today received a pass. The overflow protection utilizes Flapper Valves. Fail safe and sensor out was tested and initiated positive shut down of the turbines. All components tested received a pass. Ensure the results are forwarded to this agency.

City,State,Zip: LA MIRADA, CA 90670
Region: STATE
Facility Status: **Open - Assessment & Interim Remedial Action**
Status Date: 02/01/2017
Global Id: SL204CA2325
Lead Agency: LOS ANGELES RWQCB (REGION 4)
Lead Agency Case Number: Not reported
Latitude: 33.877602
Longitude: -118.019505
Case Type: Cleanup Program Site
Case Worker: MN
Local Agency: Not reported
RB Case Number: 0909
File Location: Regional Board
Potential Media Affected: Aquifer used for drinking water supply, Contaminated Surface / Structure, Indoor Air, Other Groundwater (uses other than drinking water), Sediments, Soil, Soil Vapor, Surface water, Under Investigation, Well used for drinking water supply
Potential Contaminants of Concern: Other Chlorinated Hydrocarbons, Tetrachloroethylene (PCE), Trichloroethylene (TCE), Vinyl chloride
Site History: The site is currently owned by PJK Properties, LLC, and occupied by All-Tex Inks Corporation. The existing building at the site was constructed in 1962. In the 1960s to the early 1970s, Tect, Inc. operated a chemical solvent reclaiming and manufacturing operation at the site. From approximately 1972 to 1981, Western Chemical reclaimed chlorinated solvents at the site, which included at least the following solvents or volatile organic compounds (VOCs): methylene chloride, perchloroethylene (PCE), trichloroethylene (TCE), and 1,1,1-trichloroethane (1,1,1-TCA). Western Chemicals operations occurred primarily in the southernmost bay of the facility. Additional tenants at the subject Site have included a diaper service and a light machine shop. Chlorinated solvents have been identified in soil, soil gas, and groundwater beneath the site. VOCs have been detected in groundwater up to the hundreds of thousands of micrograms per liter range. The groundwater plume has been tracked downgradient toward Coyote Creek to the south-southwest of the site. Its full extent is being actively assessed. An interim remediation plan has been required for the initiation of soil and groundwater cleanup closest to the site.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/27/2021	Source: EPA
Date Data Arrived at EDR: 05/03/2021	Telephone: N/A
Date Made Active in Reports: 05/19/2021	Last EDR Contact: 06/29/2021
Number of Days to Update: 16	Next Scheduled EDR Contact: 10/11/2021
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 04/27/2021

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 02/22/2021

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/22/2021	Source: Environmental Protection Agency

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Next Scheduled EDR Contact: 11/08/2021

Data Release Frequency: Quarterly

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501
Date Made Active in Reports: 04/10/2007	Last EDR Contact: 12/17/2007

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health
Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools
